Total design by Cajai Trends Creative Concepts ®

Package contents:

A: underside frame Tri-X stepper

B: frontwheel

C: steerpole

D: steer

E: Anti-Slip rubber

Assembly:

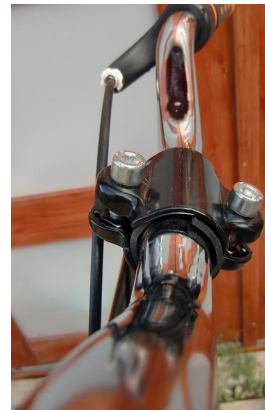

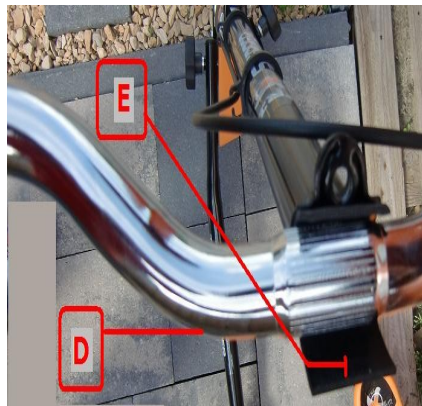

Remove the plastic. **Check** if everything is secure by presence. **Check** also if the **THREE wheels [front- and back]** are **tightly** turned. **Double check** the **wheel bearing** if it spins freely!!

Place **figure C** in a **verticale position** & **lock the QUICK RELEASE** method and make sure that it's locked!

Total design by Cajai Trends Creative Concepts®

The steer [figur D] needs to be hold on the steeringpole [Figure C] and assamble it rightly! First.. place Figure E on top of the steeringpole [Figure C] and assemble it according the following pictures:

The FRONTWHEEL needs to be EXACT in the middle of the casterframe just make sure it is! Like you allready see on picture 6.

[Picture 6]

When everything is done like you read **here above** in the manual ... finally **The FUN** can begin!!

Warning:

According to all specific SAFETY regulations we, X-Swing Europe, recommend protective clothing like Helmet/Elbow & Kneepads safety!!

Always wear protection while riding it
